

This email is provided to you on behalf of EPA and DOE's ENERGY STAR® Program.

Dear ENERGY STAR Telephony Stakeholder:

EPA wishes to thank those manufacturers that submitted comments on the Draft 1 (Version 2.0) ENERGY STAR specification for telephony. Following careful review and consideration of the comments received, EPA has developed the Final Draft (Version 2.0) ENERGY STAR telephony specification, which is attached for your review and comment.

Throughout the Final Draft (Version 2.0) ENERGY STAR telephony specification, the note boxes have been updated to provide EPA's rationale behind making revisions to the Draft 1 specification. This Final Draft specification includes the following key changes:

- The effective date has been delayed a further six months, until July 1, 2006, to coincide with the effective date of the Tier 2 ENERGY STAR specification for Single-Voltage External Ac-Dc and Ac-Ac Power Supplies.
- Telephony manufacturers are required to incorporate external power supplies that meet Tier 2 of that ENERGY STAR specification as of the new effective date of the Version 2.0 telephony specification.

Manufacturers are requested to submit any feedback and/or comments that they have on this Final Draft document to Craig Hershberg, US EPA, via e-mail at hershberg.craig@epa.gov no later than Friday, March 11, 2005.

Thank you.
